If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

IMPORTANT REMINDER: Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

**EXAMINER'S STATEMENT
OF REASONS FOR ALLOWANCE**

Claims 32, 34-36, 38-40, 42-45, and 47-83 were rejected in the Office Action entered on 10 August 2007.

This application was abandoned on 9 April 2008.

Applicants filed a petition to revive this application on 10 April 2008. That petition was granted on 6 August 2008.

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10 April 2008 has been entered.

The 10 April 2008 submission has amended claims 36 and 45.

Claims 32, 34-36, 38-40, 42-45, and 47-83 are pending in this application.

Claims 32, 34-36, 38-40, 42-45, and 47-83 are allowed.

Information Disclosure Statement

In the Information Disclosure Statement submitted on 24 May 2004, the reference AP titled "OpenVMS DCL Dictionary" was not considered by the Examiner of record at that time. The citation of the AP reference in that IDS is incomplete. On 13 November 2006, Applicants submitted the AP reference with an initialed IDS from the parent patent application. The current Examiner of record has considered this reference as submitted on 13 November 2006. The

Art Unit: 2123

Examiner has cited this reference with a complete citation on the attached form PTO-892 in the interest of providing a clear and complete record of examination.

As of this action, all references believed to have been cited in an Information Disclosure Statement during prosecution have been considered. Applicants may contact the Examiner at the phone number provided below if any issues remain unresolved.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Applicants' remarks in the 10 April 2008 submission distinguish the claimed invention over the best available prior art. In general, although the prior art teaches a "CPUID" function which identifies the version or revision number of an existing processor in a multiprocessor computing environment, the prior art does not fairly teach or suggest using the version or revision number to access *processor compatibility information* to identify a set of *new* processors that are compatible with the current processor before adding the new processor to the computer. In other words, the prior art merely identifies the current processor, whereas the claimed invention accesses stored compatibility information to identify one or more compatible processors.

These features are found in each of the independent claims as follows:

(Claim 32) *accessing the stored processor compatibility information to provide accessed processor compatibility information; executing a computer program comparing the identifying information for each current processor in the multiprocessor computer with the accessed*

Art Unit: 2123

processor compatibility information to determine the processors that are compatible with each current processor

(Claim 40) accessing the stored processor compatibility information to provide accessed processor compatibility information [...] executing a computer program comparing the identifying information for each current processor in the multiprocessor computer with the accessed processor compatibility information to determine the processors that are compatible with each current processor

(Claim 50) a third component coupled to the first and second components to access the processor compatibility information using the identify of each current processor in the multiprocessor computer to determine the processors that are compatible with the at least one current processor

(Claim 60) a fourth component coupled to the first, second and third components to compare the identifying information for the new processor with the compatibility information to determine processors that are compatible with each current processor

(Claim 70) executing a computer program comparing the identifying information for each current processor in the multiprocessor computer with the processor compatibility information to determine the processors that are compatible with each current processor

(Claim 76) obtaining processor compatibility information indicative of the identity of processors that are compatible with a plurality of processors that includes the at least one current processor [...] executing a computer program comparing the identifying information for each current processor in the multiprocessor computer with the processor compatibility information to determine the processors that are compatible with each current processor, the

Art Unit: 2123

computer program further comparing the identifying information for the new processor with the processors determined to be compatible with each current processor

For these limitations, in combination with the other claimed elements, the invention is found to be patentable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
